B. As Investigator	19
VII. Honors and Awards	20

I. Earned Degrees

Ph.D. in Neurobiology

University of California—Irvine, Department of Neurobiology and Behavior, Oct. 1993

- Conducted dissertation research in the biochemistry of protein aging in mammalian brain, and methylation of isoaspartate by protein L-isoaspartyl methyltransferase.
- Used a variety of techniques including protein purification, high-performance liquid chromatography, gel electrophoresis, biochemical assays, polymerase chain reaction, oocyte microinjection, and neural explant culture.
- Completed curriculum in neural systems, neurophysiology, neurochemistry, animal behavior, learning and memory, neuroanatomy, machine learning, models of the brain, advanced analysis of attention and learning, electronics for biologists, and disorders of the central nervous system.

B.A., *cum laude* in Chemistry/Biochemistry

University of California—San Diego, June 1987

- Undergraduate research in the biochemical analysis of the interaction between cholinergic and dopaminergic systems in rat striatum (UCSD Neuroscience Department).
- Undergraduate internship: Characterization of physical properties of synergistic mixtures of polysaccharide gums (Kelco R & D, San Diego).

II. Employment

- Professional Leave (sabbatical 2014, 2015): Maker Movement immersion, in Seattle, WA, Ireland, and the San Francisco Bay Area.
- Associate Professor (March 2008-2015) and Assistant Professor (March 2002-March 2008), Coulter Department of Biomedical Engineering at the Georgia Institute of Technology and Emory University School of Medicine.
- Director, Laboratory for Neuroengineering at Georgia Tech (2010-2013).
- Senior Research Assistant (2001-2002), Senior Research Fellow (1996-2000) and Research Fellow (1994-1996) in Biology, California Institute of Technology, Laboratories of Jerome Pine and Scott E. Fraser. All of these were non-tenure-track Research Faculty positions.
 - Researched the Silicon Neural Probe, part of the NINDS Neural Prosthesis Program.
 - Constructed one of the first 2-photon laser-scanning microscopes (1994).
 - Was the first to apply 2-photon microscopy to the development of the mouse olfactory system, the drosophila optic system, and rodent hippocampal dendritic spine plasticity.
 - Was the first to image GFP in a living animal with 2-photon microscopy.
 - Designed and constructed digital and analog circuits, including a high-speed (1000 frames/sec) CCD camera, for neural voltage imaging (US patent No. 6,633,331).
 - Developed techniques for dissociated neuron and hippocampal slice culture, multi-electrode electrophysiology and time-lapse 2-photon microscopy.
 - Developed techniques for labeling of neural transplants.
 - Developed automated computer delineation and measurement of dendritic spine morphological dynamics.
 - Invented novel sealed cell culture system (US patent No. 6,521,451).

III. Teaching

A. Individual Student Guidance

At Caltech

Postdocs mentored at Caltech:

Thomas DeMarse, now Research Faculty, U. of Florida
Axel Blau, now Faculty at the Italian Inst. of Technology

PhD Students mentored at Caltech (as *de facto* advisor):

Daniel Wagenaar, 1999-2005, **Graduated** July 2005, Dissertation title: “Development and Control of Epileptiform Bursting in Dissociated Cortical Cultures.” (Faculty at U. Cincinnati)
Albert Wang, PhD 1998, Applied Physics
Arno Klein (Sage Bionetworks)
Natalia Lukina (went into industry)

Undergraduates mentored at Caltech:

C. Michael Atkin
Matthew Vanderzee
Gray Rybka
Samuel Thompson
Andrew Mart
Miroslav Dudik
William Findley

At Georgia Tech

Postdocs mentored at GT

Chadwick Hales, Faculty at Emory University School of Medicine.
Thomas DeMarse, Research Faculty, U. of Florida.
Mark Booth (Oct 2003-Dec 2005, NSF Center for Behavioral Neuroscience Postdoctoral Fellow). Now in the private sector.

PhD Students mentored at GT

Radhika Madhavan (PhD student in Bioengineering 2002-2007, Georgia Tech) **Graduated** May 2007, Dissertation title: “*Role of Spontaneous Bursts in Functional Plasticity and Spatiotemporal Dynamics of Dissociated Cortical Cultures.*” Postdoc at the National Center for Biological Sciences, Bangalore, India (U. Bhalla lab). Postdoc with Gabriel Kreiman, Harvard U.
Zenas Chao (PhD student in Bioengineering Spring 2002-2007, Georgia Tech) **Graduated** Oct. 2007, dissertation title: “*Toward The Neurocomputer: Goal-directed Learning In Embodied Cultured Networks.*” Postdoc at the Interactive Brain Communication unit at RIKEN Brain Science Institute, Saitama, Japan (Fujii lab).
Douglas Bakkum (PhD student in Mechanical Fall 2003-2007 Engineering, Georgia Tech) **Graduated** Oct. 2007, “*Dynamics of Embodied Dissociated Cortical Cultures for the Control of Hybrid Biological Robots.*” Postdoc at the Graduate School of Information Science and Technology, University of Tokyo (Takahashi lab). Postdoc with Adreas Hierlemann, ETH Zurich, Basel.
John Rolston (MD/PhD student beginning Summer 2004, Emory U. Sch. of Medicine Neuroscience Program) **Graduated (PhD)** Dec. 2009, dissertation title: “*Multielectrode Interactions with the Normal and Epileptic Brain.*” MD internship and residency at Emory. Resident in Neurological Surgery at University of California, San Francisco.
Nathan Killian (PhD student in Biomedical Engineering 2007-2013), co-advised by Elizabeth Buffalo, Emory Neurology. **Graduated** April 2013, dissertation title: “*Bioelectrical dynamics of the entorhinal cortex.*” NSF IGERT Fellow. Postdoc with John Pezaris in the Department of Neurosurgery at Massachusetts General Hospital.
Sharanya Arcot Desai (PhD student in Bioengineering 2008-2013 **Graduated** Dec. 2013, dissertation title: “*Multielectrode Microstimulation For Temporal Lobe Epilepsy.*” Co-advised by Robert Gross, Emory Neurosurgery. Schlumberger Faculty for the Future Fellow. Research engineer at NeuroPace.

- Jonathan Newman (PhD student in Biomedical Engineering 2007-2013 **Graduated** Dec. 2013, dissertation title: “*Optogenetic Feedback Control of Neural Activity.*”). NSF Fellow. Post-doc with Matthew Wilson at MIT.
- Michelle Kuykendal (PhD student in Biomedical Engineering, ECE home school, 2006-2014), **Graduated** Aug. 2014, dissertation title: “*Closed-loop Optimization of Extracellular Electrical Stimulation for Targeted Neuronal Activation.*” Co-advised by Stephen DeWeerth (BME and ECE), and Martha Grover (ChBE). NSF Fellow.
- Ming-fai Fong (PhD student in Emory Neuroscience program 2009-2014 **Graduated**), co-advised by Peter Wenner, Emory Physiology. NSF Fellow. Post-doc with Mark Bear at MIT.
- Riley Zeller-Townson (PhD student in Bioengineering since 2009). SMART Fellow.
- Alex Calhoun (PhD student in Biomedical Engineering since 2010). NIH Imaging Training Grantee.

Masters Students mentored at GT

- Robert Ortman (Masters student in Bioengineering, ECE home school, 2008-2011). Thesis title: “Sensory Input Encoding and Readout Methods for In Vitro Living Neuronal Networks.”
- Komal Rambani (Masters student in Bioengineering **Graduated** Fall 2006, Georgia Tech) “*Thick brain slice cultures and a custom-fabricated multiphoton imaging system: Progress towards development of a 3D hybrid model.*”
- Nikhilesh Natraj (Bioengineering 2007), Georgia Tech.
- Chetna Shastry (2007, College of Computing, Georgia Tech)
- Alexander Shkolnik (MS student in Math and Computer Science, 2003, Emory University), **Graduated** Spring 2003, “*Neurally Controlled Simulated Robot: Applying Cultured Neurons to Handle and Approach/Avoidance Task in Real Time and a Framework for Studying Learning in Vitro.*” Postdoc at MIT. Founder & President, LiquidPiston, Inc.
- Peter Passaro (MS student in Bioengineering 2003-2005, Georgia Tech) Research topic: “In vitro imaging of neuromodulation and plasticity.” Transferred to University of Sussex, Brighton, U.K. Director of Data Science, Datanauts, Brighton, U.K.

Undergraduate Researchers mentored at Georgia Tech

- Caitlin Johnson (2012)
- Ethan Craig (2012)
- Eric Eisner (2012)
- Candace Law (2012)
- Silvia Vaca (2012)
- Natalie K. Fan (2011)
- Marc Powell (2011)
- Joshua Su (2011)
- Amanda Fernandez (2011)
- Ted French (2010)
- Pranav Mahadevan (2010)
- Kevin Lindsay (2010)
- Jimmy Williams (2010)
- Ushnik Ghosh (2010-2012)
- Aaron Morris (2010-2011)
- Peter McMenamin (2009)
- Chris Davis (2009)
- Ben Tsui (2008)
- Samantha Russel (2008)
- Daniel Fowler (2008)
- Ravi Patel (2008)
- Richard Gautney (2008)

Chuyong Yi (2007)

Ryan Haynes (2005-2007, BME major) Marshall Scholar, now at Oxford, UK

Yixiao Zou (2006-2009, BME major) Goldwater Scholarship Awardee, now PhD student at Yale)

Matthew MacDougall (2002-2003, Emory University, now MD/PhD student at Caltech/USC)

Alexander Shkolnik (Emory University, now postdoc at MIT)

Blythe Towal (ECE major, Now PhD student at Northwestern U.)

John Brumfield (Fall 2003-Spring 2005, BME major, now in industry)

Bobby Thompson (2004-2006, BME major)

Bhavesh Mehta (2005-2006, BME major, now PhD student at Duke U.)

Santiago Archila (2005-2006, BME major, now PhD student in Emory Neuroscience program, and IGERT Scholar)

Jennifer Salgado (2004, BME major, Now PhD student at Medical College of Georgia)

Summer Interns in the Potter Lab

Aidan Smyth (Summer 2012)

Scott Stapley (Summer 2011)

Nisha Bhat (Summer 2011)

Will Schweitzer (Summer 2011 SURE program)

Sam Rakowski (Summer 2011 ION program for high school students)

Christopher McDonald (Summer 2010, visiting high school teacher)

Rose Malinow (Summer 2010)

Sid Tantia (Summer 2009, CBN BRAIN program)

John Slack (Summer 2008, high school student, CBN Institute on Neuroscience program)

Wen Hui Tan (Summer 2007, from MIT; CBN BRAIN program)

Eleanor Ory (Summer 2005, from Smith College; PRAXIS Fellow)

Chris Grubb (Summer 2005, from Rose-Hulman Inst. of Tech.; CBN BRAIN program)

BME Senior Design Students:

Ryan Haynes

Herna Coe

Jennifer Salgado

Jessica Lott

Heidi Khalil

Ima Ebong

James Hamlin

Shalin Shah

Lennie George

B. Other Teaching Activities

As Assistant Professor (Georgia Tech)

- Developed Real-World Curriculum for Introductory Neuroscience BMED/BIOL4752, taught since Fall 2005.
- Won the top teaching award from the University System of Georgia, The Excellence in Teaching Award, FY2013.
- Won Georgia Tech's top teaching award, the 2011 W. Howard Ector Outstanding Teacher Award.
- Developed lab and lecture curriculum for new NeuroEngineering Fundamentals course BMED 4400, taught since Spring 2004.
- Taught brain-computer interfaces, Neuromorphic Cognition Engineering Workshop, Summer 2010.
- Developed curriculum for graduate Hybrid Neural Microsystems course, taught Fall 2004, 2006, Spring 2009.
- Facilitated Problem-Based Learning in Biomedical Engineering, BMED 1300 (ten semesters).
- Taught 3D Live Cell Imaging short course, U. of British Columbia, Summers 2002-2004.

- Served as Guest Lecturer in numerous courses at Georgia Tech and Emory.

As Research Faculty (Caltech)

- Served as guest lecturer for CNS 163, Sleep and Dreams (three years).
- Served as guest lecturer for Ph/Bi 103, Neuroscience for Physicists and Engineers (two years).
- Developed curriculum and co-taught Principles of Modern Microscopy, Fall, 2000.
- Taught 3D Live Cell Imaging short course, U. of British Columbia, Summers 2000 and 2001.

As grad student (UC Irvine)

- Served as teaching assistant for undergraduate psychobiology lab course, including curriculum development and writing for the laboratory manual (three years).
- Sole teacher of the department's graduate neurochemistry lab course (two years).

As undergrad (UCSD)

- Served as Teaching Assistant for freshman chemistry (two years).

D. Presentations

Distinguished Invited Talks

1. “Meet the Experts” session leader, Society for Neuroscience annual meeting, New Orleans, Oct. 13, 2012.
2. Opening speaker and panelist, “Brains in dishes: Animats and Hybrot” panel, International Neuroethics Society annual meeting, New Orleans, Oct. 12, 2012.
3. TEDx talk: “[Neuroengineering: Neuroscience, applied](#),” Atlanta, April 7, 2012.
4. Opening speaker and panelist at special symposium, Brain Enhancement: Its Impact on Human Mind and Evolution, Emory University School of Medicine, May 2, 2011.
5. Public Keynote Lecture, Dynasty Foundation’s “Life: The Scientific Version” exhibit, Moscow, March 30, 2011.
6. Panelist, The Science Gallery (Trinity College, Dublin) “Visceral” exhibit, Art-Science Ethics panel, Feb. 9, 2011.
7. Keynote Lecture, Joint Southeast Nerve Net/Georgia-South Carolina Neuroscience Consortium conference, Atlanta, March 5, 2010.
8. Brain-Machine Interfaces panel, IEEE Systems, Man, & Cybernetics conference, San Antonio, Oct. 12, 2009.
9. Keynote Lecture, Institute on Neuroscience Summer Research Program, Emory University, Aug. 1, 2008.
10. Plenary Lecture, “In the Presence of the Body” conference at the Center for Biotechnology and Interdisciplinary Studies: Rensselaer Polytechnic Institute, Troy, NY, April 23, 2007.
11. Panel Leader, 50th Anniversary Summit of Artificial Intelligence, Ascona, Switzerland, July 10, 2006.
12. Keynote Lecture, MEA Symposium: Multielectrode array studies and neuronal plasticity, Free University Amsterdam, July 3, 2006.
13. Plenary Speaker, Optical Society of America, Ft. Lauderdale, March 23, 2006.
14. Distinguished Lecture, Brains & Behavior Program, Georgia State University, April 11, 2006.
15. Plenary Lecture, Society of Biological Psychiatry Annual Meeting, San Francisco, May 17, 2003.
16. Inaugural Lecture, Georgia Tech Tuesday Talks, Feb. 22, 2005.
17. Plenary Lecture, Vanguard Conference: "Where Life Meets Technology" Madrid, July 22, 2003.

18. Keynote Lecture, Southeast Multiphoton User Group Meeting, Atlanta, Aug. 30, 2002.
19. Keynote Lecture, Harvey Mudd College Presentation Days, Claremont, April 23, 2001.
20. Keynote Lecture, Information Science Innovations 2001, Natural & Artificial Intelligent Systems Organization, Dubai, U.A.E., March 18, 2001.

Other Invited Talks (*Non-invited* presentations are represented in Conference Papers or Abstracts)

1. Dublin Maker center stage, Trinity College Dublin, Ireland, July 25, 2015
2. DXArts Art & Brain course, University of Washington, Seattle, Apr. 10, 2015.
3. SimBioTech/ISAT meeting, Seattle, March 3, 2015.
4. Department of Physiology and Biophysics, University of Washington, Seattle, Dec. 11, 2014.
5. Assn. of American Colleges & Universities, Project Kaleidoscope (PKAL) — Advancing what works in STEM education, Atlanta, Oct. 14, 2013.
6. Georgia Tech BRAIN Symposium, Atlanta, Oct. 8, 2013.
7. Atlanta Science Tavern, Atlanta, Oct. 27, 2012.
8. Emory University Frontiers in Neuroscience seminar, Atlanta, Oct. 19, 2012.
9. Univ. of Illinois Neuroengineering Seminar, Urbana-Champaign, IL, Feb. 29, 2012.
10. NeuroArts Conference, University of Plymouth, U.K., Feb. 11, 2011.
11. Neuromorphic Cognition Engineering Workshop, Telluride, Colorado, June 28, 2010.
12. University of Manchester School of Computer Science, Manchester, U. K., June 17, 2010.
13. Ruhr University, Bochum Research Department of Neuroscience, Bochum, Germany, June 10, 2010.
14. Max Planck Inst. Bernstein Center for Computational Neuroscience, Göttingen, Ger., June 23, 2009.
15. Purdue University, Biomedical Engineering Seminar, Lafayette, IN, Dec. 10, 2008.
16. Technion University, Center for Network Biology, Haifa, Israel, July 14, 2008.
17. UC Davis, Department of Biomedical Engineering, Davis, CA, May 23, 2008.
18. Georgetown University, Department of Physics, Washington, DC, April 16, 2008
19. “Whence the Self” Aspen Consciousness Research Retreat, Mind Science Foundation, Aug. 4, 2007
20. Gordon Conference on Nonlinear Science, Colby College, Maine, June 27, 2007.
21. General Motors Research, Sigma Xi Lecture, Warren, MI, March 16, 2007.
22. Investigators of Mind, Brain, & Intelligent Artifacts Student Group, U. of GA, Athens, March 7, 2007.
23. University of Illinois, Bioengineering Seminar, Urbana-Champaign, Feb. 8, 2007.
24. Johns Hopkins University Mind-Brain Inst. Bodian Seminar, Baltimore, Feb. 5, 2007.
25. Emory University Frontiers in Neuroscience, Atlanta, Dec. 1, 2006.
26. Winship Cancer Inst. Georgia Imaging and Microscopy Symposium, Atlanta, Aug. 24, 2006.
27. Southeast Multiphoton Excitation User Group Meeting, Atlanta, Aug. 11, 2006.
28. Biology Graduate Seminar, Georgia State University, April 21, 2006.
29. Physics Colloquium, University of South Florida, Tampa, March 24, 2006.
30. Northwestern University Biomedical Engineering Seminars, May 12, 2005.
31. Arizona State University Soft Matter Seminars, April 27, 2005.
32. Center for Theoretical Biophysics, UC San Diego, Jan. 21, 2005
33. Microscopy and Microanalysis Conference, Savannah, Aug. 3, 2004.
34. Biocomplexity Seminar Series, Indiana University, Bloomington, May 10, 2004.
35. Canadian Undergraduate Technology Conference, Toronto, Jan. 23, 2004.
36. National Institute on Drug Abuse, NIH, Nov. 17, 2003.
37. Neuroscience Program Seminar, UC San Francisco, Oct. 16, 2003.
38. IEEE Eng. in Medicine & Biology Society MiniSymposium Invited Speaker, Cancun, Sept. 19, 2003.
39. Microscopy & Microanalysis Conference, San Antonio, Aug. 6, 2003.
40. Department of Information Technology, U. of Zurich, Switzerland, July 15, 2003.
41. Embodied AI, Schloss Dagstuhl, Germany, July 9, 2003.
42. Computational Neuroscience Seminar, Duke University, Durham, NC, May 22, 2003.
43. Keck Laboratory for Biological Imaging and Department of Anatomy, U. of Wisconsin, Madison, May 6, 2003.
44. Cognitive Science Seminar, Emory University, April 2, 2003.

45. Substrate-Integrated Microelectrode Arrays Conf., Denton, Texas, March 6, 2003.
46. Emory University School of Medicine, Dept. of Pathology, Feb. 18, 2003.
47. Emory Mini-Medical School, Atlanta, Oct. 22, 2002.
48. Cognitive Science Program, Georgia Institute of Technology, Oct. 11, 2002.
49. Frontiers in Neuroscience, Emory University, Atlanta, Oct. 4, 2002.
50. Department of Cellular Biology, University of Georgia, Athens, Aug. 27, 2002.
51. Multi-Dimensional Microscopy 2001, Melbourne, Nov. 26, 2001.
52. Department of Anatomy and Human Biology, University of Western Australia, Perth, Nov. 29, 2001.
53. Health Sciences & Technology Division, Harvard/MIT, May 31, 2001.
54. Department of Bioengineering, University of California, Berkeley, April 30, 2001.
55. Department of Bioengineering, University of Pennsylvania, Feb. 8, 2001.
56. Multiphoton Microscopy in the Biomedical Sciences, SPIE, San Jose, Jan. 22, 2001.
57. Department of Cell Biology, University of Texas Southwestern Medical Center, Dallas, Dec. 12, 2000.
58. Multi-Unit Symposium, Society for Neuroscience, New Orleans, Nov. 7, 2000.
59. Department of Biomedical Engineering, Emory University/Georgia Tech, Atlanta, Aug. 24, 2000.
60. Department of Neurology, Washington University, St. Louis, April 17, 2000.
61. SilicoNeural Group Meeting, University of Stirling, Scotland, April 6, 2000.
62. Computational Molecular Biology Seminar Series, Caltech, Feb. 7, 2000.
63. Department of Brain and Cognitive Sciences, MIT, Jan. 6, 2000.
64. Massachusetts General Hospital Neuroimaging Group, Jan. 5, 2000.
65. Bioengineering Department and Institute for Medicine and Engineering, University of Pennsylvania, Philadelphia, Nov. 16, 1999.
66. Developments in Multichannel Recording III, Miami, Oct. 23, 1999.
67. Neuroengineering Group, Georgia Tech, Atlanta, Oct. 12, 1999.
68. 2nd International Symposium on GFP, San Diego, May 25, 1999.
69. Neural Information Processing Systems, Population Coding Workshop, Breckenridge, Colorado, Dec. 5, 1998.
70. Jet Propulsion Lab, Center for Integrated Space Microsystems, Nov. 3, 1998.
71. 5th International Congress of Neuroethology, San Diego, Aug. 23, 1998.
72. Multiphoton Microscopy Symposium, Microscopy Society of America, Atlanta, July 11, 1998.
73. Department of Veterinary Pathobiology, Texas A&M University, March 31, 1998.
74. Keystone Symposium on Synapse Formation and Function, Park City, Utah, March 12, 1998.
75. Department of Neuroscience, University of California San Diego, Dec. 9, 1997.
76. Symposium on Applications of Multiphoton Imaging, Cleveland, Aug. 10, 1997.
77. Southern California Society for Microscopy, Pasadena, May 16, 1996.
78. 3-D Microscopy of Living Cells Symposium, Scanning96, Monterey, April 10, 1996.
79. British Society for Cellular Biology, GFP Symposium, York, England, March 1996.
80. Functional Imaging and Optical Manipulation of Living Cells, San Jose, Feb. 2, 1996.
81. 14th Pfefferkorn Conference on Biological Specimen Preparation, Belleville, Illinois, Aug. 8, 1995.

Conference Papers

1. Newman, J. P., Patel, Y. A., Potter, S. M., & Butera, R. J. (2013), Puggle: a miniature, real-time data acquisition and processing system for closed-loop electrophysiology. Paper presented at the 6th International IEEE EMBS Neural Engineering Conference, San Diego. “#1 Most Scanned Poster Award”
2. Schwoebel, J., Craig, E., Joseph, A., Vakharia, A., Potter, S. M., & Fasse, B. (2013). Developing Interdisciplinary Research Partners: The Learning by Innovative Neuro Collaborations Research URE. Paper presented at the Proc American Soc. for Eng. Education, Atlanta.
3. Desai, S. A., Gutekunst, C.-A., Potter, S. M., & Gross, R. E. (2012). Analyzing neuronal activation with macroelectrode vs. microelectrode array stimulation. IEEE Proceedings of the 34th EMBS, 34, FrA17.3.

4. Kuykendal, M. L., Guvanasen, G. S., Grover, M. A., Potter, S. M., & DeWeerth, S. P. (2012). Closed-loop extracellular electrical stimulation and optical recording for increasing the selectivity of the stimulus-evoked response within a neuronal population. Paper presented at the Biomedical Engineering Society Annual Meeting, Atlanta.
5. Newman, J. P., Fong, M.-F., Laxpati, N., Zeller-Townson, R., French, T., & Potter, S. M. (2012). Optogenetic feedback control decouples network spiking from other forms of neural activity. 8th International Meeting on Substrate Integrated Microelectrode Arrays, 8, 92-93.
6. Newman, J. P., Fong, M.-F., & Potter, S. M. (2012). A real-time optogenetic feedback controller to clamp network firing. Society for Neuroscience, 207.15.
7. Newman, J. P., Tchumatchenko, T., Fong, M.-F., & Potter, S. M. (2012). Amplitude modulated photostimulation for probing neuronal network dynamics. Twenty First Annual Computational Neuroscience Meeting, 13(Suppl. 1), P71.
8. Newman, J. P., Fong, M.-F., Laxpati, N., French, T., & Potter, S. M. (2012). Optogenetic feedback control decouples network spiking from other forms of neural activity. Paper presented at the FENS, Barcelona.
9. Bhatti, A., Nahavandi, S., Potter, S. M., & Garmestani, H. (2012). Unified spike sorting framework using multi scalespace principle component analysis. 8th International Meeting on Substrate Integrated Microelectrode Arrays, 8, 242-243.
10. Powell, M. P., Fong, M.-F., & Potter, S. M. (2012). A novel removable culture chambering system for multi-well MEAs. 8th International Meeting on Substrate Integrated Microelectrode Arrays, 8, 282-283.
11. Fong, M.-F., Newman, J. P., Potter, S. M., & Wenner, P. (2012). Impaired glutamatergic activity triggers homeostatic GABAergic plasticity. Society for Neuroscience, 46.22.
12. Fong, M.-F., Newman, J. P., Wenner, P., & Potter, S. M. (2012). Identifying activity perturbations that trigger homeostatic synaptic plasticity. 8th International Meeting on Substrate Integrated Microelectrode Arrays, 8, 82-83.
13. Fong, M.-F., Newman, J. P., Potter, S. M., & Wenner, P. (2012). Microelectrode array recordings reveal activity perturbations that trigger homeostatic synaptic plasticity. Paper presented at the FENS, Barcelona.
14. Dai, J., Venayagamoorthy, G. K., Harley, R. G., & Potter, S. M. (2012). Reservoir-computing-based, Biologically-inspired Artificial Neural Network for Modeling of a Single Machine Infinite Bus Power System. Paper presented at the IEEE International Joint Conference on Neural Networks, Brisbane.
15. Potter, S. M. (2011). Real-world neuroscience assignments for learning what matters in the Real World. Proceedings of the Society for Neuroscience, 23.12SA.
16. Desai, S. A., Potter, S. M., & Gross, R. E. (2011). Distributed high frequency microstimulation for the treatment of focal epilepsy and advances towards closed-loop technology. Proc. Society for Neuroscience, 672.11.
17. Ortman, R. L., Venayagamoorthy, G. K., & Potter, S. M. (2011). Input Separability in Living Liquid State Machines. Paper presented at the Adaptive and Natural Computing Algorithms - 10th International Conference, Ljubljana, Slovenia.

E. Other Scholarly Accomplishments

Host to visiting scientists

- Bradley Cooke, Assistant Professor, Georgia State University (2011-2012)
- Philip Gamblen and Guy Ben-Ary of U. of Western Australia, Perth (Jan-May 2006)

Patents

- Potter, S. M. and Pine, J. (2003). "High-speed CCD array camera with random pixel selection." US Patent [6,633,331](#)
- Potter, S. M. (2003). "Sealed Culture Chamber." US Patent [6,521,451](#)

Research-related media articles, interviews, and TV specials

Science Channel series: "Through the Wormhole" with Morgan Freeman, season opener 2011; Full-length documentary, "Is this art? - Volume 4: MEART The Semi Living Artist" by ArtFilms; Robots Podcast; BBC Horizon documentary "Human v2.0"; WIRED Magazine, The Economist, New York Times, Discover, IEEE Intelligent Systems, New Scientist, National Geographic, Photonics Spectra, Technology Review, US News & World Report, BBC News, NPR, "Beyond Human" TV special, CNN, Canadian Broadcast Company, Australian Broadcast Company, and others.

V. Service

A. Professional Contributions

- Director, Laboratory for Neuroengineering, 2009-2013 (NeuroLab has 7 faculty and >50 researchers)
- Associate Editor, *Frontiers in NeuroRobotics*, 2007-2015
- Research Topic Editor, *Frontiers in Neural Circuits*, 2012-2013
- Council Member, Society for Neuroscience, Atlanta Chapter, 2006-2011
- Member, Scientific Advisory Boards in Neuroscience and Robotics/AI, Lifeboat Foundation, 2008-present
- Brain-Machine Interfaces session organizer and chair, IJCNN conf., Atlanta, June 14, 2009
- Neural Imaging and Recording session organizer and chair, IEEE EMBS conf., NYC, Aug. 31, 2006
- Cellular Neuroimaging session organizer and chair, IEEE EMBS conference, Cancun, September, 2003
- Served as peer reviewer for over 50 journal articles and foundation grants.
- Served on NIH R01/R21 grant review study sections since 2003
- Served on NSF grant review panels since 2001
- Served on NIH SBIR grant review study section, October, 2000
- Creator and administrator since 1996, Multi-Photon Microscopy Users internet mailing list
- Creator and administrator since 1998, Multi-electrode Array Users internet mailing list
- Professional Societies:
 - Society for Neuroscience - SFN
 - Microscopy Society of America - MSA
 - IEEE Engineering in Medicine & Biology Society - EMBS
 - International Neural Network Society - INNS
 - International Society for Optical Engineering - SPIE

B. Campus Contributions

- Faculty Advisor, GTNeuro student club

- Student Computer Ownership Committee, Georgia Tech, 2009-2013
- Elected to Executive Committee, Neuroscience Graduate Program, Emory GDBBS, 2007-2011
- BME Awards Committee 2009-2011
- BME Educational Assessment Committee 2006-2008
- BME Faculty Recruiting Committee 2002-2004
- BME Faculty Advisory Committee 2003-2004, 2012
- PhD Dissertation committee member: Varadraj Vernekar (advisor: LaPlaca), Paul Garcia (advisors: Ditto, Calabrese) Gustavo Prado (advisor: LaPlaca), Jim Ross (advisor: Steve DeWeerth), Toshiro Endo (advisor: Ron Arkin).
- Faculty, NSF Center for Behavioral Neuroscience
- Program Faculty, Emory University Neuroscience Graduate Program
- Program Faculty, GT Robotics & Intelligent Machines

C. Other Contributions

Creator and Leader, The Group Mind (lay public reading group on books about brains and minds, 2 years)

VI. Grants and Contracts

A. As Principal and Co-Principal Investigator

NIH NINDS R01NS079757 “Optogenetic Population Clamp to Study Long-term Plasticity in Vitro,” \$1.5M over 5 years, beginning July 2012.
Role: sole PI

NIH NINDS EUREKA R01 grant NS079268, “Autonomous Optogenetic Inhibition of Epileptic Activity Using a Bioluminescent Light Source,” \$1.23M across 4 years, beginning May 2012. (Robert Gross (Emory Neurosurgery), PI)
Role: Co-PI

Emory Neurosciences Initiative Seed Grant, “Optical Neural Stimulation to Control Bursting,” \$40k, one year beginning May 2009. (Co-PIs Robert Gross (Emory Neurosurgery), Dieter Jaeger (Emory Biology).
Role: Co-PI (among 3)

NSF Office of Emerging Frontiers in Research and Innovation (EFRI) program for Cognitive Optimization and Prediction (COPN) collaborative projects grant 1238097, “Neuroscience and Neural Networks for Engineering the Future Intelligent Electric Power Grid,” \$2M over 4 years, beginning Nov 2008. (Co-PIs Ron Harley (GT ECE); Kumar Venayagamoorthy, and Don Wunsch, Missouri S&T)
Role: Co-PI (among 4)

NIH NINDS R21 “Distributed Microstimulation for Epilepsy,” \$372k over 2 years, beginning Sept. 2008. (Robert Gross, Emory Neurosurgery, PI)
Role: Co-PI

Epilepsy Research Foundation New Therapies Grant, “Closed-loop microstimulation with multielectrode arrays to suppress epileptic seizures,” \$100k over 1 year + \$24k matching from the COE, beginning Aug 2007. Robert Gross (Emory Neurosurgery) Co-PI.
Role: PI

National Academies-Keck Foundation Futures Initiative Smart Prosthetics Grant, “Testbed for Developing Direct Cortical Feedback of Proprioception for Smart Limb Prostheses,” \$75k over 2 years beginning June 2007, Jose Carmena (Berkeley) Co-I.
Role: Sole PI

Coulter Foundation Translational Partners Award, “Multi-Electrode Microstimulation To Treat Intractable Seizures In A Rat Model Of Focal Epilepsy,” \$300k over 3 years (July 2006-2009), Robert Gross (Emory Neurosurgery) Co-PI.
Role: PI

Cutting-Edge Basic Research Award from NIDA R21-DA018250, “Chemical Reward Systems for Embodied Cultured Networks,” \$300k over two years beginning Aug 2004.
Role: sole PI

NIH Bioengineering Research Partnership RO1 EB000786 from NINDS/NIBIB, "A 3-D Microfluidic/Electronic Neural-Interfacing System" \$7M over 5 years beginning Aug 2002.
Role: Co-PI (among 7), Stephen DeWeerth PI.

NIH New Neuroscience Technology RO1 NS38628 grant from the NINDS, “Multi-electrode and imaging analysis of cultured networks” \$1.2M over 5 years beginning Apr 1999.
Role: sole PI.

\$100k startup funds, Georgia Tech President’s Office
\$100k startup funds, College of Engineering Dean’s Office
\$250k startup funds, The Whitaker Foundation

B. As Investigator

NIH SBIR “Simultaneous Stimulation and Recording in Scalable Multielectrode Arrays,” \$329K over two years. James Ross (Axion Biosystems) PI.
Role: Investigator, Consultant

NSF Center for Behavioral Neuroscience Venture Grant, “Multi-electrode approaches to probing affective circuits in awake, behaving animals,” Don Rainnie (Emory Psychiatry) PI.

NIH-NINDS 5R01NS045072-03 12/15/02-5/31/08 “Strain-Induced Scarring & its Effects on Microelectrodes” Role: Consultant (Bellamkonda PI)

NIH-NIMH 1T32MH067547-01A2 7/1/05-6/30/10 “GT-Emory Postdoctoral Training Program in Neuroimaging Sciences” Role: program faculty and instructor (Douglas Bremner, PI, Emory SOM)

VII. Honors and Awards

Awards

- “Top 20 Science & Engineering Professors in Georgia” 2013 StateStats.org and OnlineSchoolsGeorgia.com
- University System of Georgia [Excellence in Teaching Award FY2013](#) (\$5,000 – Sole winner across all research universities in the USG.)
- Advisor of the Year, 2013, Georgia Tech President’s Council Governing Board.
- Frontiers 2012 Editorial Award (€400) from Frontiers in Neuroscience for Research Topic “Closing the Loop Around Neural Systems,” which had over 40 papers submitted.
- Georgia Tech Class of 1940 W. Howard Ector [Outstanding Teacher Award](#) (\$10,000, Georgia Tech’s highest teaching honor), 2011.
- 1st Prize (€18,000) VIDA 12.0 (Fundacion Telefonica’s artificial life art contest) for our Silent Barrage project.
- Georgia Tech BMES “Outstanding Faculty Award,” 2008.
- “Thanks for Being a Great Teacher,” Georgia Tech Center for the Enhancement of Teaching and Learning, 2008-2013.

Editorship

Invited to serve as Associate Editor and journal organizer for Frontiers in NeuroRobotics, 2007

Independently written scholarly treatments on our research

- Philosophical implications of our work were analyzed in the book, “Studies in Applied Philosophy, Epistemology and Rational Ethics,” in the chapter “Of (zombie) mice and animats,” by Slawomir Nasuto and John Bishop, Springer, 2013.
- J. Sage Elwell analyzes philosophical and theological aspects of bioart, including an extensive discussion of our MEART project, in his book, “Crisis of Transcendence: A Theology of Digital Art and Culture,” Lexington Books, 2011.
- Our work with neurally controlled animats is described in the textbook, Introduction to BioMEMS, by Albert Folch, CRC Press, 2012.
- Evolution Haute Couture: Art and Science in the Post-Biological Age (Book + DVD in Russian and English ©2009, Kaliningrad National Center for Contemporary Arts) by Dmitry Bulatov contains several pages and a documentary video about our MEART project.
- The Potter Group was (along with another anonymous lab) the focus of an entire 5-year research project and book, “Science as Psychology: Sense-making and Identity in Science Practice” by Lisa Osbeck, Nancy Nersessian, Kareen Malone and Wendy Newstetter (Cambridge U. Press, 2011)
- A philosophical journal article analyzing our work entitled, “Brains, vats, and neurally-controlled animats,” was independently written by N. C. Manson, in Stud. Hist. Phil. Biol. & Biomed. Sci. 35 (2004) 249–268.
- A page about our work, “Studying Neural Networks with Hybrots,” appears in the college textbook, *Psychology, 3rd Canadian Edition*, by Santrock & Mitterer, 2006.
- Several pages were written about our work by Rolf Hughes in the scholarly book, “Architecture and Authorship” (Black Dog Publishing, 2007).
- Several pages describe our “pioneering” work, in “How the Body Shapes the Way We Think: A New View of Intelligence,” by Rolf Pfeifer and Josh Bongard (MIT Press, 2007).
- Our semi-living artist project is described in “Rat” (from the Animal series) by Jonathan Burt, (Reaktion Books, 2006).

Exhibits

Our MEART project is featured as the first art installation in the lobby and reception of the Center for Biotechnology and Interdisciplinary Studies (similar to the IBB at Georgia Tech) at Rensselaer Polytechnic Institute, Troy, NY. Boryana Rossa, RPI Bioarts Initiative, exhibit designer and curator.

Our Silent Barrage project was exhibited at: Exit Art as part of the Corpus Extremus (LIFE+) show, Feb-April 2009, New York, reviewed in Nature, 12 March 2009;
Sao Paulo Art and Technology Biennale, Itau Cultural, Brazil, July 2010;
Visceral: The Living Art Experiment, Jan-Feb. 2011 The Science Gallery, Dublin;
TransLife, NAMOC Triennial of Media, Organized by the National Art Museum of China, July-Aug. 2011.

Grant-related

- 1.3 percentile score on RO1 application to NIH NINDS New Neuroscience Technology (NS38628), 1999
- Cutting-Edge Basic Research Award, best score for 2004, in R21 application to NIH NIDA (DA18250), 2004
- National Research Service Award, Postdoctoral Fellowship from NIH (NS10257), 1995
